OBJECTIVE

I am a Node.js / MERN Stack Developer with 2 years of experience building backend services and full-stack web applications. My work primarily involves designing REST APIs, handling authentication and authorization, managing databases with MongoDB, and ensuring secure client-server communication. I enjoy solving real-world problems, improving system performance, and writing maintainable code. I'm currently looking for opportunities to work on challenging products and collaborate with strong engineering teams.

TECHNICAL SKILLS

Frontend:	HTML5, CSS3, JavaScript (ES6+), React.js, Redux, React-Router, Tailwind CSS, API Integration
Backend & APIs:	Node.js, Express.js, RESTful APIs, JWT & OAuth Authentication, Multer, MVC Architecture
Databases:	MongoDB, Mongoose, Aggregation Pipelines, Schema Design, MySQL, Transactions
Tools:	Git, GitHub, Postman, VS Code, NPM
Core Competencies:	MERN Stack, Full-Stack Development, CRUD Operations, Access Control, Debugging, SDLC

WORK EXPERIENCE

Software Engineer — Cperts Digital Solutions Pvt. Ltd.

Backend Developer | March 2024 – Present

- Developed and maintained scalable backend applications using Node.js, Express.js, MongoDB, and RESTful APIs, ensuring high performance and reliability. Implemented JWT Authentication, Refresh Tokens, OTP Verification, and Role-Based Access Control (RBAC) to secure application resources.
- Integrated Cashfree Payment Gateway for payment processing, transaction verification, refunds, and webhook management.
- Designed and optimized MongoDB schemas, aggregation pipelines, indexing, and query performance for scalable data handling. Built reusable middleware for validation, authentication, authorization, logging, and centralized error handling.
- Developed production-ready features including pagination, filtering, search, file uploads, soft delete, notifications, and audit tracking.
- Collaborate with frontend developers to integrate APIs and ensure efficient data exchange and application performance. Debug backend issues, monitor API performance, and improve system reliability and scalability.
- Tech Stack: Node.js, Express.js, MongoDB, Mongoose, JWT, Cashfree, REST APIs, Multer, Cloudinary, Git, GitHub, Postman.

Frontend Developer Intern — Lean IT Incorporation

Frontend Developer | Aug 2023 – Jan 2024

- Developed a responsive, high-performance landing page featuring a dynamic image carousel and RESTful API integration to fetch and render content in real time, achieving 50% faster page load speeds.
- Developed dynamic UI components and improved page performance.

PROJECTS

E-Commerce Web Application — MERN Stack

- Developed a full-stack e-commerce web application using React.js (frontend), Node.js & Express.js (backend), and MongoDB (database).
 - Built RESTful APIs, protected routes, session handling, and CRUD-based product management. Applied state management, responsive UI, and component-based architecture for better usability and performance.
- Tech Stack: React.js, Node.js, Express.js, MongoDB, Bootstrap, REST APIs, CRUD Operations

Job Portal Application

- Engineered a MERN-based recruitment platform enabling employers to publish job listings and candidates to discover and apply for opportunities. Developed secure authentication and authorization mechanisms using JWT and Bcrypt, with differentiated access for recruiters and applicants.
- Implemented functionality for resume submission, job filtering, profile management, and application tracking.
- Designed RESTful services with robust server-side validation and middleware to enforce API security and data protection.

EDUCATION

Bachelor of Computer Science - (BCS) | CGPA - 9.75
Punyashlok Ahilyadevi Holkar Solapur University

Aug 2020 – May 2023
